WHAT WE OFFER

Lets us offer you all a technology which will help you increase your chance of success. Meta tools is constantly scanning the Twitter activity of a carefully selected number of 'Influencer' Twitter feeds for Keywords or Keystrings/Phrases. It then cross-references these with the Live Pairs on ETH blockchain, finding any Keyword matches and delivering them to our users.

This means that if a Twitter Influencers Tweets a specific word that Meta tools determines is being launched, it will deliver this to our users in Live time, allowing them to Invest in what could be the beginning of a highly profitable trend.

A longside delivering these prospective triggers, we will also offer further market data metrics such as:

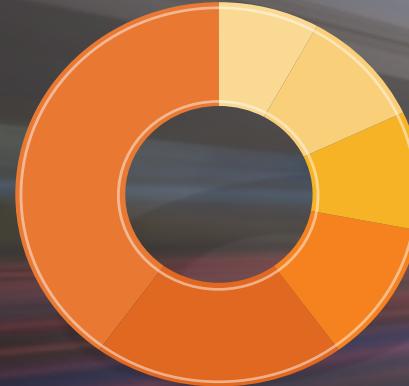

- ✓ MarketCap
- ✓ The Current All-Time-High
- ✓ Volume/Liquidity
- ✓ Verify Checker
- ✓ Liquidity Locker
- ✓ Taxes

These metrics will allow users to make a decision on whether the token being displayed is worthy of investing in, further allowing them to decipher which keywords are trending.
